

Crown Park Pool Removal Update

The project will begin with the contractor mobilizing on Tuesday, 3/5. Initial activities will include erosion control, fencing, pedestrian control and protection as well as soil sampling and testing. The physical removal work will begin shortly after those tasks have been addressed. The project is expected to be completed by the first of April.

“Thanks for the Memories” Pool Gathering Recap

The “Thanks for the Memories” pool event, rescheduled after the February 9 snow storm, garnered friendlier weather and some additional historic photos to add to the digital collection. The event was held yesterday from 1pm to 3pm at the Camas Community Center and featured photo collections, written history, “memory cards,” scanning area and refreshments. A small group of guests – all of them “children of the 50s and 60’s” – brought photos, news clippings, life guard training cards, and patches for us to scan and save to the digital archives. They also brought their memories, which Parks & Recreation staff enjoyed hearing and talking about. The Columbian attended and wrote an article, with photos, for today’s paper. <https://www.columbian.com/news/2019/feb/28/camas-washougal-residents-share-memories-say-goodbye-to-crown-park-pool/>

All of the photos and information gathered for and during this event will be digitized and given to both the Two Rivers Heritage Museum and the Camas Public Library.
